

NEW TITLE

Monetary and Exchange Rate Systems

A Global View of Financial Crises

Edited by **Louis-Philippe Rochon**, Assistant Professor of Economics, Laurentian University, Canada and **Sergio Rossi**, Associate Professor of Economics, University of Fribourg, Switzerland

Combining critical perspectives with a positive contribution to economic policy, both national and international, this book considers the causes and consequences of recent financial crises presenting cutting-edge material.

The editors bring together a number of well-known scholars to offer their views and elaborate on alternative solutions with respect to the Washington Consensus on how to restructure the monetary and financial system in order to avoid financial crises in the future. The book deals with a number of issues, such as the Asian financial crises of the 1990s, exchange rate arrangements, financial liberalization and capital controls. The contributors take a critical approach, providing the elements for a new analysis of monetary and exchange rate issues in the modern world.

Monetary and Exchange Rate Systems will be extremely useful for researchers and policymakers interested in monetary macroeconomics and in the international financial system.
